<p>Your comments:</p>	<p>Today, the UN report on climate change has been released. It starkly states that the problems with the warming of the planet are down to us ... mankind. The issue is widespread and it's actually increasing - just look at the wildfires in Greece and California.</p> <p>East Riding of Yorkshire Council and the government has declared a climate emergency. What possible good for the planet would be the further extraction of a fossil fuel from this site at West Newton and the burning of excess gas? We will never reach our targets for carbon reduction if we continue with developments like this.</p> <p>The road through my village (Bilton) is busy enough without additional HGV's causing pollution and it would make the route from Sproatley to Wyton unsafe (the pathway between Wyton and Sproatley is extremely narrow in places and very close to the carriageway).</p> <p>I love the countryside around the Burton Constable area and have found it to be a place of calm over the period of the pandemic as a peaceful escape - it would be a travesty to spoil it with this development.</p> <p>Future generations will be harmed the most from the consequences of this development and it will be down to all of us when they look for someone to blame. Please, this really must not be allowed to go-ahead.</p>
