<p>Your comments:</p>	<p>Object.</p> <p>As a keen group cyclist, we are all very familiar with the roads around the site which</p> <p>We have used for years. There is no way they are suitable for HGV use due to the width</p> <p>And condition, they are rural roads which are ideal for cycling due to light traffic use.</p> <p>I firmly believe that to have HGVs using these routes will be a danger not only to cyclists but to</p> <p>Anyone wanting to enjoy the countryside associated with this area.</p> <p>I am sure the council members will be aware of the heavy traffic on our roads now, how bad will it be with yet more HGVs on the road?</p> <p>The proposals put forward go against actions which have been undertaken worldwide to eliminate the use of fossil fuels and reduction of the carbon footprint, not to increase it.</p> <p>Gas boilers are to be phased out along with petrol and diesel vehicles, as are coal burning power stations. Surely, we should be concentrating on putting resources into solar and wind projects many of which are on our own doorstep, instead of poisoning the local area of outstanding beauty with more pollution from traffic, noxious gas burning and possible farmland contamination.</p>
