Your comments:	<p>Whilst I appreciate that the development in question is outside Bilton I am concerned that much of the additional traffic may come through our village, making the quality of life for the residents poorer. I understand that much of the heavy lorries will be diverted away from Main Road Bilton to along the A165 but this will certainly have an impact on the area. I often cycle and run in the area and have concerns to the amount of HGV's that will be added to the already heavy traffic. Making it more dangerous for these activities. I also walk my elderly mum around that area and feel this spoil our walks.</p> <p>I further believe that as the Government agenda is to push for more sustainable provision of energy, and to move away from fossil driven energy, I would have to question what such expansion of the facility at West Newton will do for this government goal. With many authorities already signed up to raise their concern over the effects of global warming and have indeed issued their own warnings of the "global emergency" created by all countries using fossil fuels, which the science suggest is already causing long term damage to the world and it's resources. It is for these reasons that i object to the expansion of this site.</p>
