<p>Your comments:</p>	<p>The increase in noise and light pollution from the site will impact the wildlife in the surrounding area. Furthermore, the vibrations during nearly two years of drilling is likely to negatively impact on the wildlife and local environment.</p> <p>Traffic is thought to be another significant area of concern. It is reported there could be 200,000 HGV trip, harmful diesel pollution along the whole route, including through Hull and Beverley.</p> <p>Most importantly, as climate change is a concern high on the global agenda the further release of methane and carbon dioxide (CO2) should be enough to raise concerns. In addition, the development alone would result in 200,000 tonnes of CO2 equivalent greenhouse gas pollution.</p> <p>It is therefore my belief that this proposed development should not be given the 'green light'.</p>
