This planning application will have a huge impact on this beautiful part of East Yorkshire. Traffic in the area, particularly on Mulberry Road and Hull Road, Skirlaugh is already horrendous in respect of speed or cars and motorbikes/noise and this will only get worse if more HGV's etc will be coming into the area. There is also lots of large farm vehicles/HGVs which use this roads, so having more will cause problems. We already have speed and horse signs in the area but they are of no use as they ignored by the majority of drivers and speed vans are rarely seen. The police are aware of the issues of speeding etc.

It will also cause huge environmental issues in respect of air pollution/vibration and visual look of our local countryside. There are also many horse riders and cyclists in the area who use Mulberry Lane, Skirlaugh and villages surrounding Burton Constable to exercise; this is highly likely to have an impact to all users as we need to use them to access local bridleways which there are not many of. Having all this additional traffic in the area will potentially be putting us at risk as we are not allowed on surrounding farm land. On a personal note I also suffer with asthma and moved to the country very recently to help with this.

I urge East Riding Council to seriously think about the impact this is going to have on local wildlife, look of the countryside, pollution, fumes, tranquility etc and also the safety of others who use this area, therefore I strongly object to this planning application.
