Your comments:	<p>I object to this expansion. We are experiencing a global climate and ecological emergency, which is already causing significant disruption, damage and death for people and whole ecosystems. East Riding of Yorkshire Council passed a motion to Declare a Climate and Ecological Emergency in February 2021, acknowledging the seriousness of the situation. This emergency has been created by the intense burning of fossil fuels and degradation of nature since the industrial revolution, and it is clear that we must end our any further extraction and burning of fossil fuels urgently to prevent making the damage worse. On the grounds that we are in an Emergency situation I ask that this planning application is rejected and that serious attention and investment is put into attracting sustainable and renewing energy production (and other initiatives) to the East Riding. This Earth is our shared home, and though we may not have control over everything that happens we do have the opportunity to act wisely, responsibly, and justly with the things that we can control.</p>
