Your comments:	<p>I have horses at home and ride the areas and roads in question. I struggle as it is with the volumes of traffic. This would increase plus large lorries that I would not expect to ensure regular. This could cause injury to me or/and or my horse. I have lived this area all my life and I loved the semi rural location that is being ruined by increased motor transport. I also ride a bike on the roads with my family for pleasure and exercise I feel this will increase the accident risk due to increased lorry and transport. You have granted a crematorium locally, additional houses in the village of Preston, the semi rural area is becoming more and more built up. The roads are not build for levels of increased traffic. Little is being done in relation to speeding traffic all over this area which is increasing risk to those riding horses or bikes. This will create more risk and there WILL be a serious accident before long.</p> <p>I also have further concerns to the impact on the farmland and ecological habitats that are being taken away due to all the increased building. You are taking away this special countryside. Climate change is a real threat, the impact is conquering as what this means with the extension. You granted permission for a solar farm that generates for another county council!!!!!! they seem to be considering their environment but ERYC certainly do not.</p> <p>I feel this increase for all the above is a step to far and I strongly object.</p>
