<p><b>Your comments:</b></p>	<p>I am aware of this app. as I am in Fossil Free East Riding Group. I am also in a Climate Change Action Group and a Transition Town Group for Bridlington. I object for several reasons, but mainly because in a world where we must bring greenhouse gases and pollution under control for the sake of combating Climate Change, it seems a highly inappropriate proposal because although not fracking, it will be extracting a vast amount of oil which will of course be used in carbon dioxide emitting business enterprises. Beyond this I believe are the decades of fossil fuels production, up to 25 tankers a day operating on quiet country roads, ; drilling for 24hrs a day 7 days a week with all the noise and obstruction that will entail.</p> <p>I personally object on the grounds that apparently the nearby stretch of East Yorks Wolds is up for nomination as an AONB. Plus that will include what is bound to become known as Hockney Country due to his large seasonal landscapes. And if one or both of those 'touristy' enterprises come to pass, then they will engender far more benefit and profit for the area than a distasteful unfriendly damaging and polluting process (in my opinion).</p> <p>I know what I would rather look forward to for the area that has been my adopted home for the past 23yrs , even if I live a good 30miles from this site.</p>
