Your comments:	<p>Object : I am writing to inform you of my objections to the oil and gas development at West Newton in Holderness, on the following grounds :</p> <p>The extra traffic through my community will be even busier than it already is ,leading to potential incidents /accidents and even more emissions on the roads of Holderness .</p> <p>More danger for cyclists and walkers in the area (of which I am one)</p> <p>The potential for gas and odour leaks at the site which will be harmful for residents.</p> <p>If hydraulic fracturing is used to develop these wells , this could lead to the water tables being effected and the ecosystem and livestock being harmed as they depend on this essential resource .</p> <p>I cannot understand how the ER Council can approve this development having publicly declared a climate emergency recently.</p> <p>Having worked in the Oil and Gas industry a lot over my career in Engineering , both on and offshore , I now realise fossil fuels have had their day and must be phased out.</p> <p>I am fully aware of the effects of the conventional drilling process on the marine environment, so I dread to think how any hydraulic fracturing and acid washing will effect the rural environment in this area.</p>
