<p><b>Your comments:</b></p>	<p>I object to this application because of the detrimental affect it will have on the area and the people living in the vicinity.</p> <p>The drilling will impact on the local environment as it will cause noise and light pollution, vibration and air pollution from the sites releasing methane and carbon dioxide (greenhouse gases). There will also be an increase in the amount of heavy traffic in the area, which will be visiting the site, causing diesel pollution. Air pollution and water contamination will be caused by the toxic chemicals used in hydraulic fracking which are largely unregulated. These toxic chemicals could leak into the water supplies, poisoning groundwater and polluting surface water thereby threatening livestock and wildlife.</p> <p>There is also growing evidence that it is not safe for people to live near these sites because of the impact on public health. The toxic chemicals used can cause severe headaches, asthma, childhood leukemia, cardiac problems, birth defects and cancers.</p> <p>Considering the warnings being issued about the impact of these types of operations on climate change, the government allegedly supporting a green agenda to reduce harmful greenhouse gas emissions and the affects on public health; I really don't understand why this application has not been kicked in to touch !!</p>
