<p>Your comments:</p>	<p>I feel very strongly about allowing that is a banned practice in many European countries of fracking going ahead in the locality. This is not good for the environment which is something that is at the forefront of global Governments. I would question why do we need oil when we should be moving away from oil and using clean energy such as wind power.</p> <p>I like to cycle around this area it is quiet and rural and tranquil. The area is beautiful and the air quality is clean, it is not an industrial site and nor should it become one.</p> <p>HGVs should be confined to motorways and A roads not rural country roads. By allowing all this extra heavy traffic will most certainly prevent me from cycling or walking around the area and I pass many cyclists on my travels. Cycling is a passion for me and this would present not only a danger to me on a bike but also to the quality of my life and enjoying a bike ride around the clean air and tranquil roadways. I would not feel safe riding where HGVs are constantly travelling up and down the roads and I don't want to be breathing in diesel fumes.</p> <p>If this is passed this will open the doors for any business wanting to destroy the lovely countryside, damage our wildlife, remove all the clean air and destroy the roads. It is just not acceptable it never will be and the council need to prevent this and concentrate on cleaner energy for us all to enjoy now and for future generations to come.</p> <p>I therefore plead with the council that this does not go ahead and that the climate, the residents of East Riding the wildlife, the clean air all take priority over money and the destruction of our countryside for the sake of us all. Keep us safe, that is your job.</p>
