Your comments:	<p>Object</p> <p>I object to this development on the following grounds:</p> <p>Volume of HGV traffic & Public Safety.</p> <p>Hugely increased HGV traffic on unsuitable rural roads poses a very real danger to Cyclists, Horse riders, runners, pedestrians, commuters and many others who frequently use the route through Burton Constable, Marton and New Ellerby. As a local resident I can see first hand the dangers posed by increasing HGV traffic on these narrow, ill equipped rural roads. If this is allowed to continue I believe it is only a matter of time before a fatal accident occurs.</p> <p>Industrialisation of Rural Landscape.</p> <p>The roads and footpaths surrounding this development are used and enjoyed by many people all year round and, if this further development is allowed to continue, these 'Public Footpaths' will be closed and guarded by Security forces as they have been on many occasions throughout the previous developments at West Newton A. Removing, closing and preventing Public rights of way has a negative impact on local residents and other members of the public's well being.</p> <p>Burton Constable Hall & the surrounding area forms an attractive part of Mid Holderness. Introducing and allowing the development of these oil and gas sites will destroy the tranquility of the local area, not to mention the negative impacts on air quality, noise pollution and local Wildlife population.</p> <p>Climate.</p> <p>I understand that a Climate Emergency has been declared both locally and nationally. I believe allowing this development to continue contradicts Environmental policy.</p>
